

NEC Innovation Day 2023

# Healthcare and Life Sciences Business

December 15, 2023

Corporate SVP, Head of Healthcare and Life Science Division

Masamitsu Kitase

# History of NEC's Healthcare and Life Sciences Business

## Over 50 years of experience and results

Focusing on the development of technologies in the healthcare and life science fields, we have contributed to people's secure lifestyles.

Integrate all healthcare-related businesses to  
**Healthcare and Life Sciences Division**

\*1 List of facilities that introduced hospital information systems in FY2020 (according to a survey by "Gekkan Shin Iryou" [Monthly New Medical Care])

# NEC's Focus Areas and Marketability

In a wide range of fields such as treatment, drug development, and medical device development

Analog  
Wet

Digital  
Dry

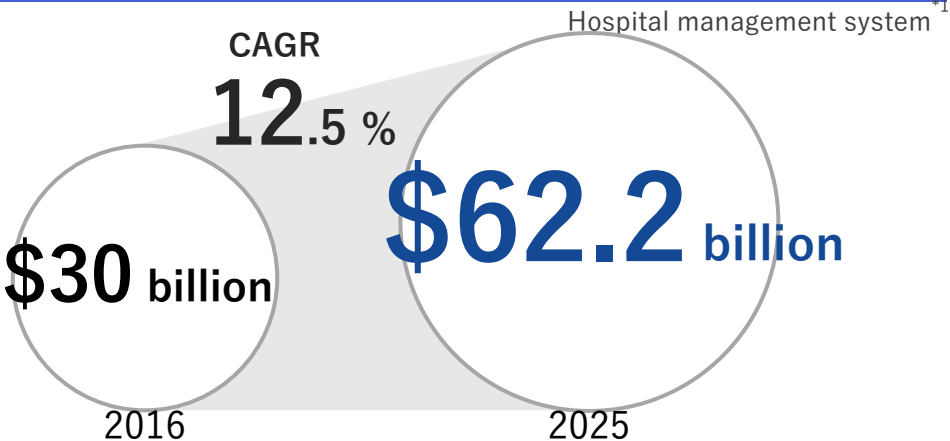

Market transformation is ongoing

Improvement of health care economics through digitalization

Data-driven operational efficiency improvement and decision-making

Hospital DX

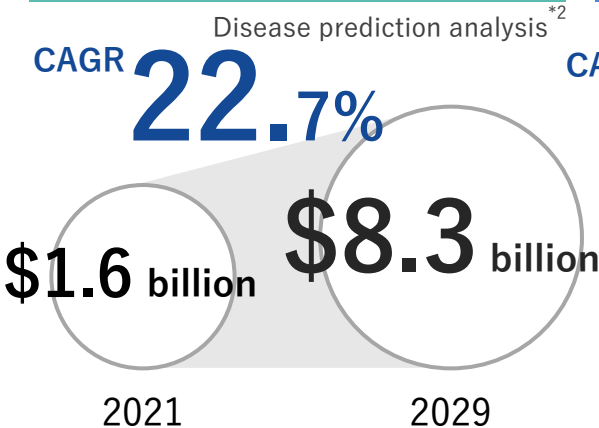

Expand personalized medicine with broad health data and AI

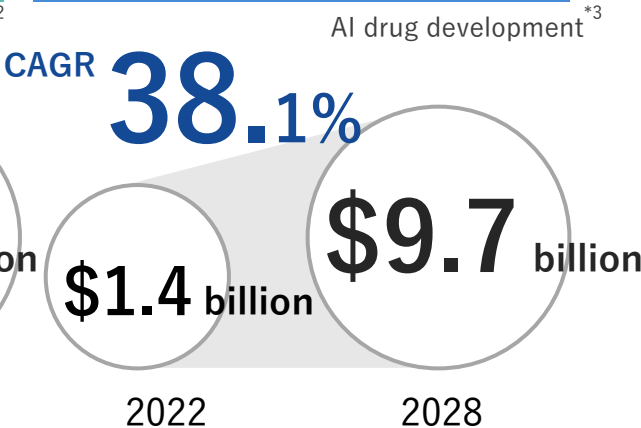

Everyone is different, everyone's disease is different.

Testing and Health Promotion Services

AI Drug Development

<sup>\*3</sup> BIS Research, Global Neoantigen Cancer Vaccine Market

# Overview of NEC's Healthcare and Life Sciences Business

# HLS Business Sales and Operating Profit Growth Targets

FY2023→ FY2030

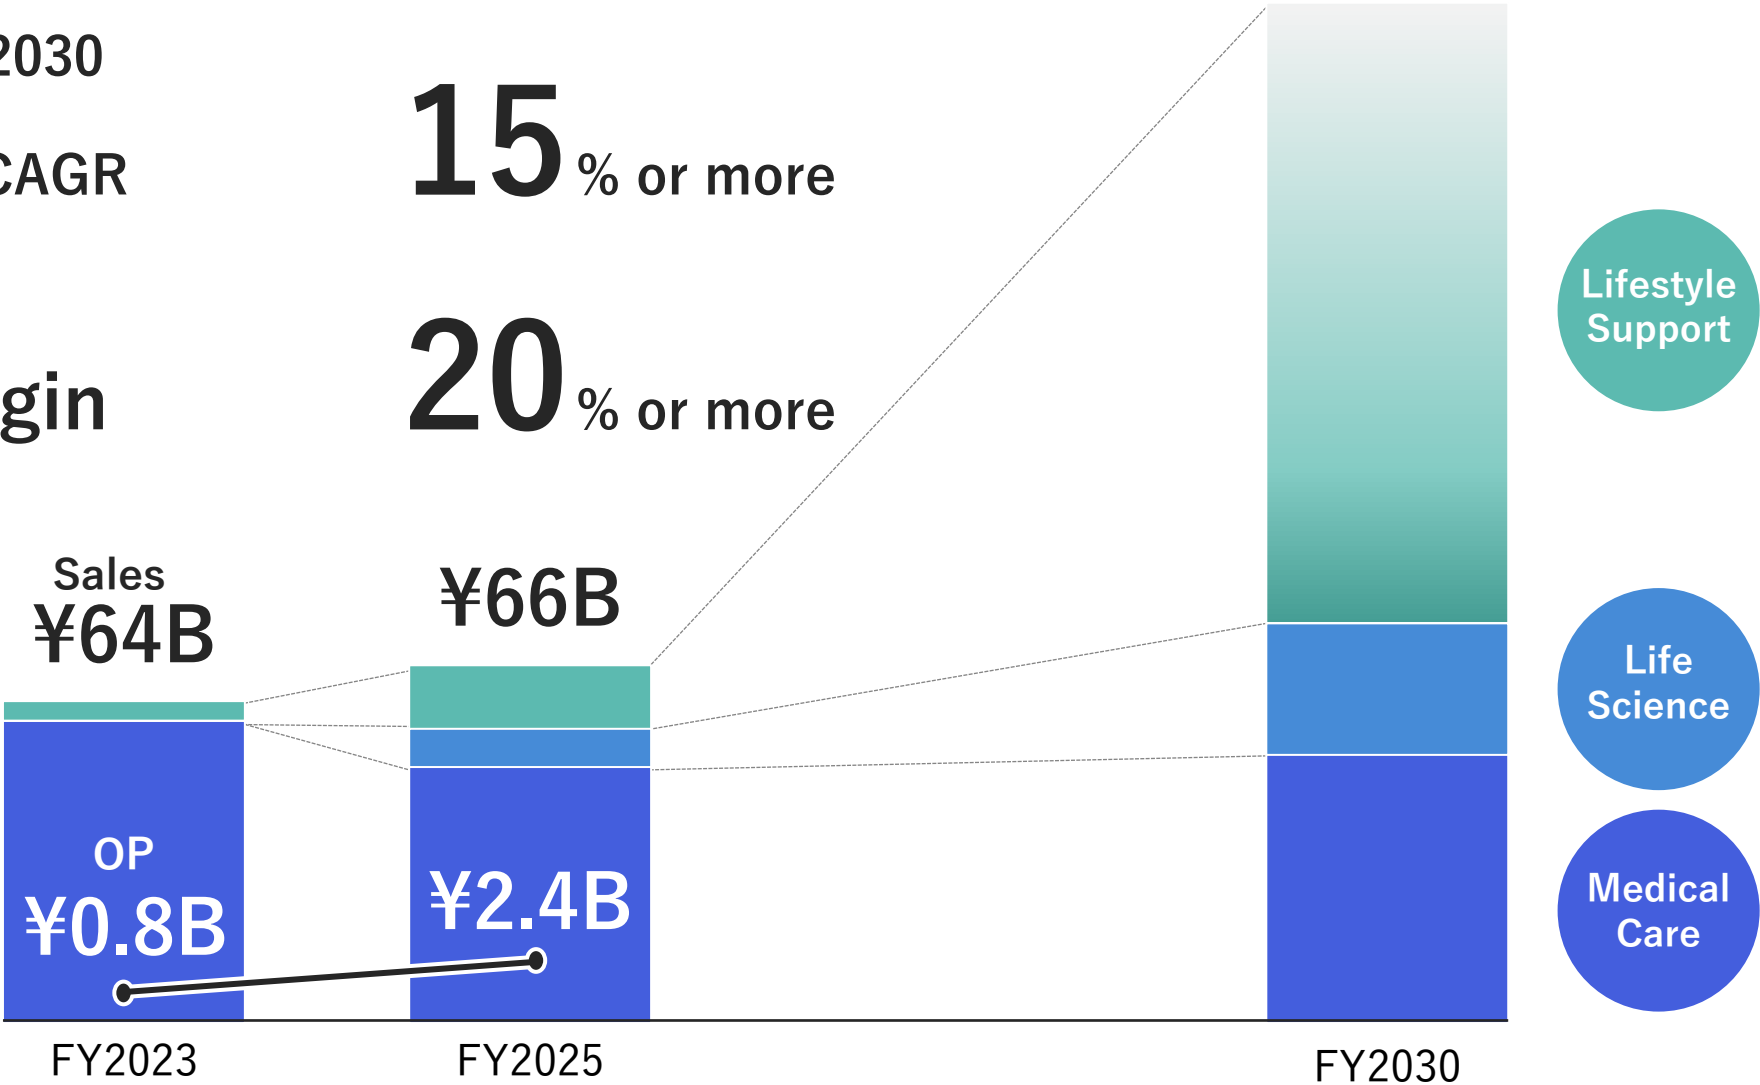

**Sales CAGR**

**15%** or more

FY2030

**OP Margin**

**20%** or more

## AI-driven hospital management and healthcare quality improvement

### IT Services Achievements

Medical  
Accounting  
System

**1,400** facilities

Electronic  
Medical  
Record  
(EMR)

**1,000** facilities

DX Services

**120** facilities

- Online medical care and conference support
- Voice support
- Digital medical consultation
- Cloud secure connectivity

2023 PoC for medical documentation support using generative AI

# Business Growth of EMR and Hospital DX

Aiming to improve the profitability of EMR and medical accounting systems, as well as to expand earnings through the growth of the Hospital DX business

FY2023 to FY2030  
**Operating profit  
x2**

## Hospital DX

**Improvement of hospital management efficiency and advancement of medical service operations**

- Develop strategies to enhance medical DX in Japan
- Improve the work style of medical professionals by leveraging generative AI
- Expand collaborative services with startups

## EMR and Medical Accounting System

**Safe and secure medical Infrastructure**

**Standardization of EMR information**

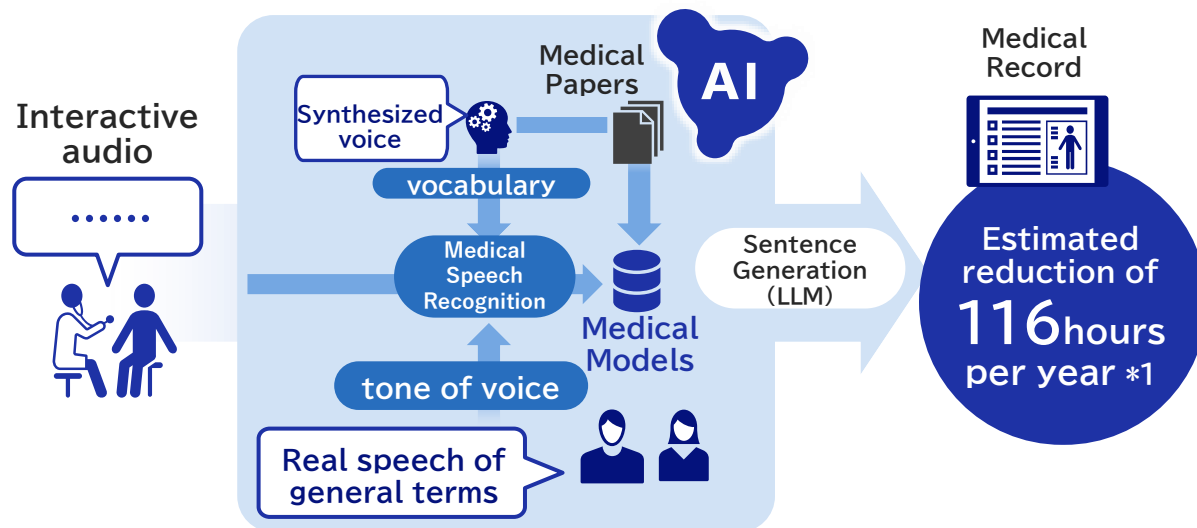

- Enhance profitability through cloud integration and unified management of engineering department
- Improve service quality through a data-driven approach
- Monetize security business operations

# | Business – Phase II: Case Study: LLM for Physician Services (Tohoku University Hospital) |

By supporting the creation of electronic medical records and medical documents with LLM, the time required to create medical documents has been halved, and the possibility of improving operational efficiency has been confirmed.

## Automatic creation of electronic medical records

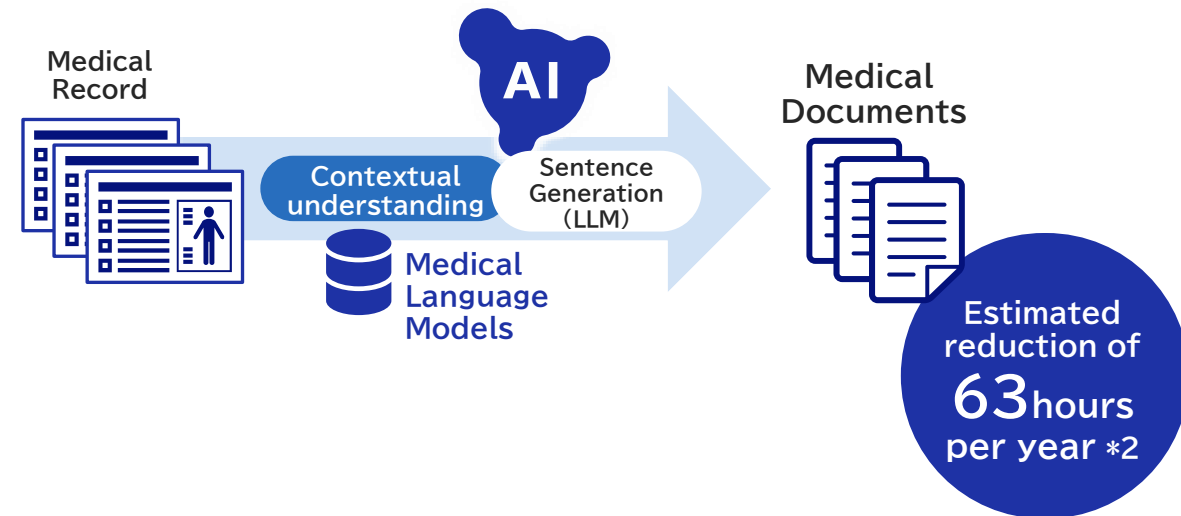

LLMs that have learned medical terminology automate the creation of medical records

\*1 Inference values based on on-site observations

## Automatic creation of medical documents

Understand medical terminology and treatment progress, and summarize medical records  
Eliminates the need for doctors to re-read medical records

\*2 Evaluation results by 10 physicians at Tohoku University Hospital

Reducing the workload of physicians with records. Aiming to create an environment where doctors can concentrate on their medical practice

# Commercialization Roadmap of Generative AI Utilization

Medical  
Care

Provide sustainable medical services  
by utilizing NEC's technology and business know-how

**Generative AI will be implemented  
through EMR in FY2024!**

## Step 2 Support management

Visualization of business conditions,  
Support hospitals to improve profitability

## Step 1 Reduce workload

Pursuing efficiency  
Contributing to work style reform of medical  
professionals

Services provided by NEC Group  
Measure various proteins from a small amount of blood  
and visualize health status and future disease risk

## Visualizing disease risk and health status with AI to improve lifestyle

2020 Commencement of operations

2023 Additional test items:  
Prediction of the risk of developing dementia within 5 years

### Achievements

#### Measurement Services

Orders from major

9

Japanese  
pharmaceutical  
companies

#### Test and Intervention Services

Domestic

Arao City

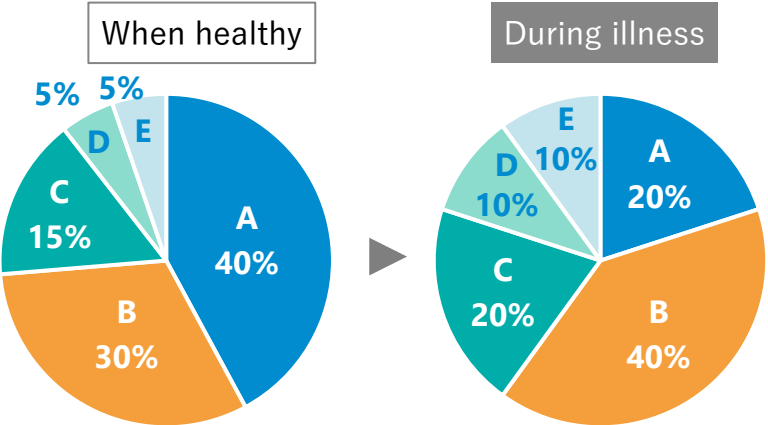

Cooperation with  
local governments

Overseas

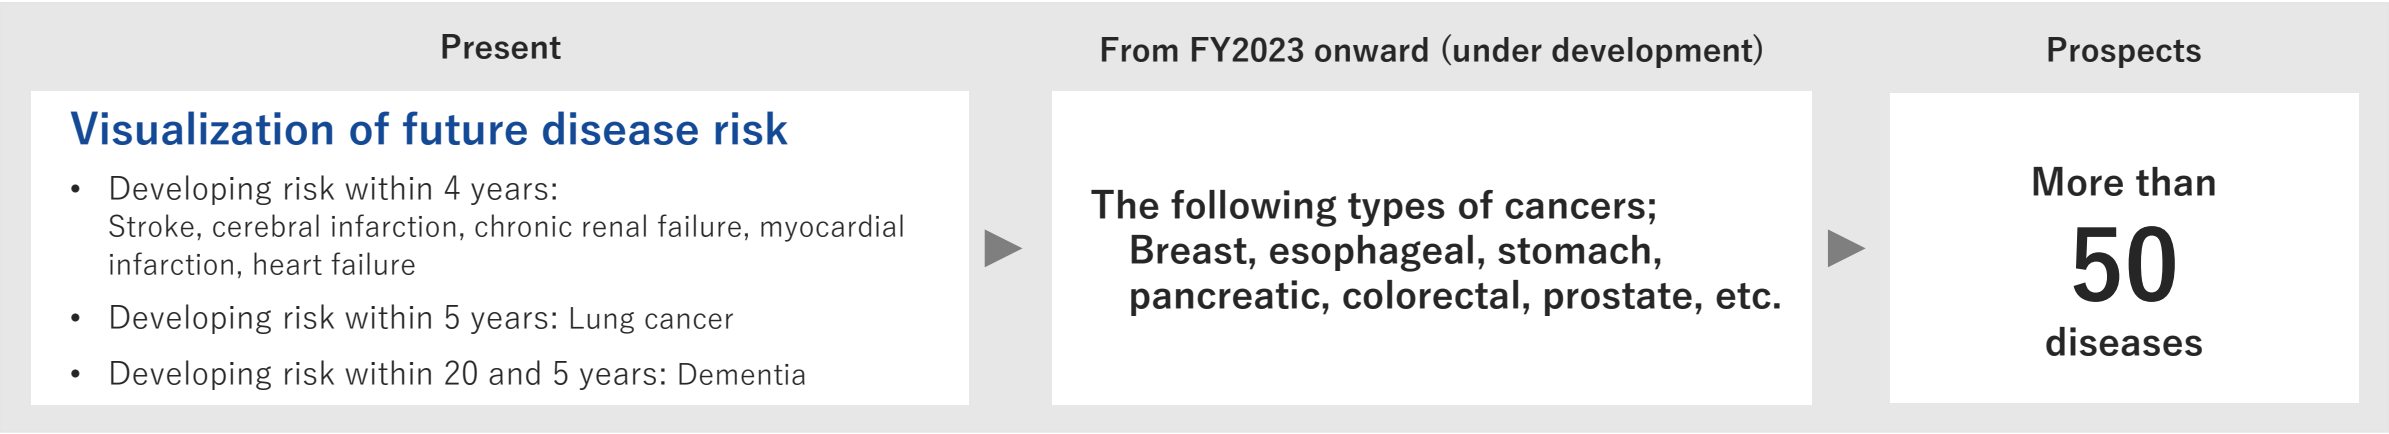

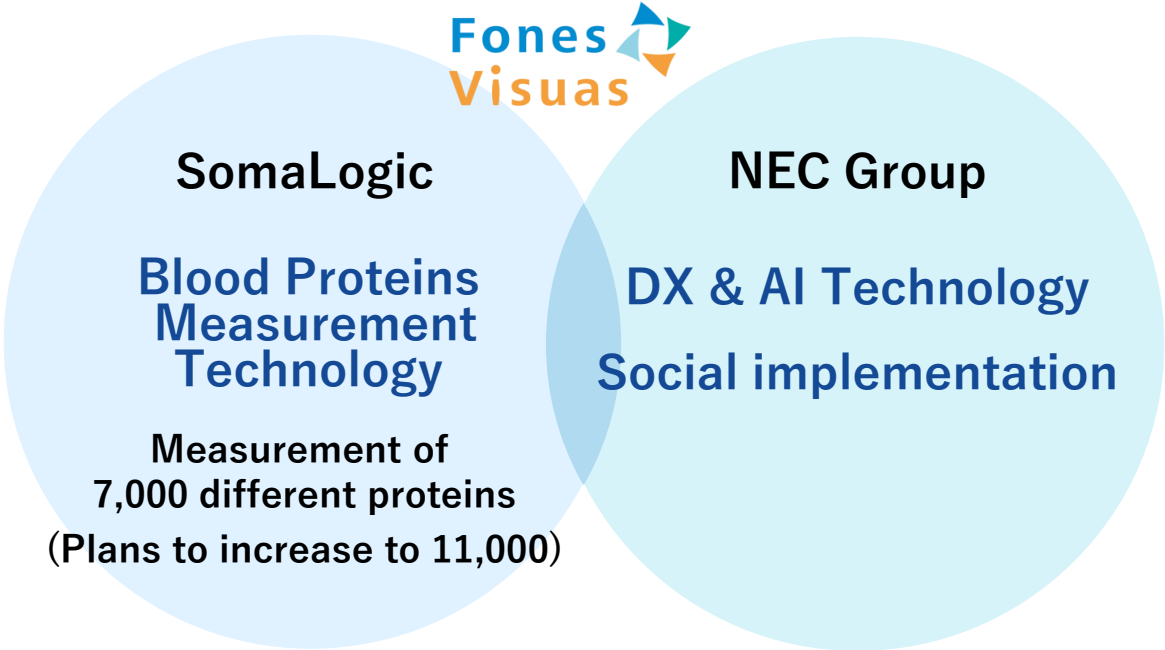

Order received  
in Hong Kong  
Expanding to  
Middle East and  
ASEAN

# Strengths of Fones Visuas

Genes may not change,  
but proteins change from day to day.

# Customer Issues and Provided Services

## Overseas (Middle East • ASEAN)

**Assessing future risk of disease  
by using cutting-edge technology  
Visualize own condition clearly**

- **Lifestyle related disease** increased
- Focus on **medical tourism** as an economic measure
  - Singapore, Thailand
- **Provide comprehensive welfare services** to global companies' local employees

## Domestic Municipalities

**Concentrate follow up on those at high risk  
Improve lifestyle**

- Difference between life expectancy and healthy life expectancy is roughly 10 years
- 50% of nursing-care insurance cost is covered by public funds
- The number of individuals with **severe dementia and stroke** who require a high level of care is increasing.

### Dementia

Medical and nursing expenses\*<sup>1</sup>  
Annual cost: **7.6million** per person

### Stroke, cerebral infarction

Medical and nursing expenses\*<sup>1</sup>  
Annual cost: **8.8million** per person

\*<sup>1</sup> Estimated by a research company from the 2017 Health, Labor and Welfare Publication Report, 2019

# Growth of Fones Visuas Business

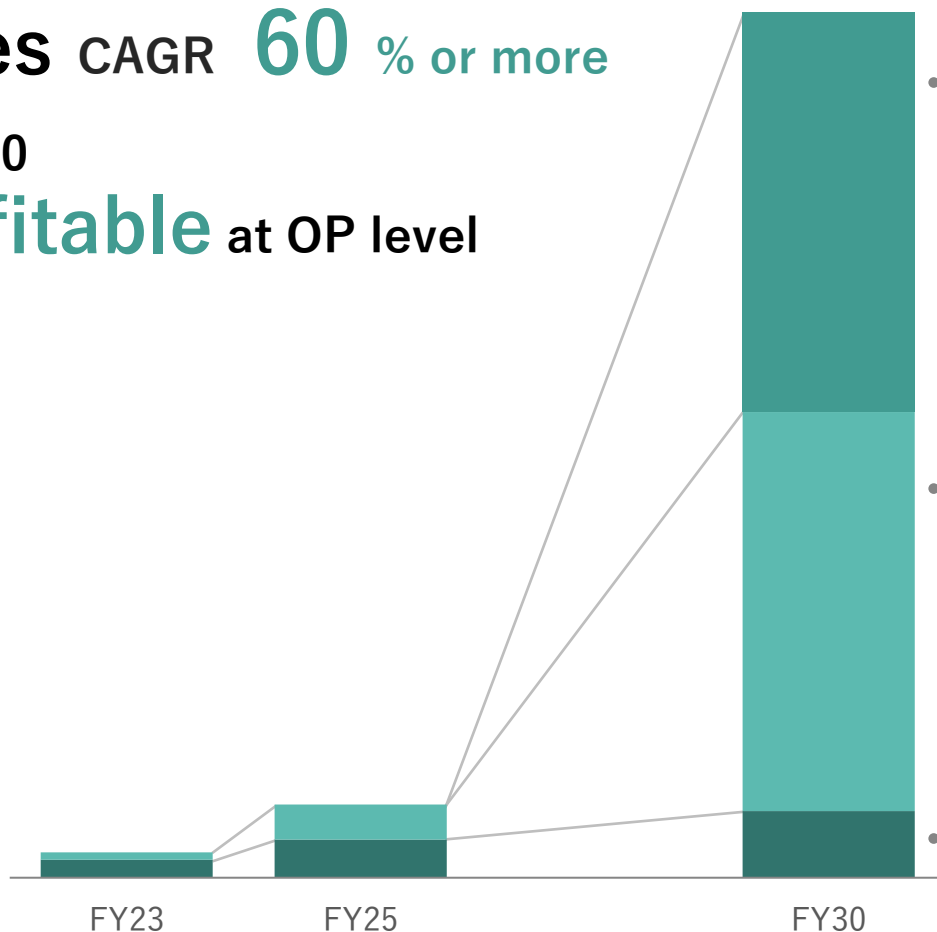

Lifestyle  
Support

FY2023 to FY2030

**Sales** CAGR **60 % or more**

FY2030

**Profitable** at OP level

## Test and Intervention Services in Overseas Market

**Alliance with local medical institutions, etc., with a focus on Middle East and ASEAN**

- Capture demand from health-conscious affluent overseas consumers

## Test and Intervention Services for Domestic Municipalities Providing test and lifestyle improvement services to municipalities

- Extending the healthy life expectancy of residents and curbing the cost of medical and long-term care benefits for local governments
- Realizing a sustainable society

Currently working with Arao City, Kumamoto Prefecture, and discussions are underway with several municipalities.

## Measurement Services

**Contracted by pharmaceutical companies and academia for clinical trials and research purposes**

- Measures about 7,000 protein types at once without the need to install equipment (to be increased to 11,000 types)
- Streamlining biomarkers search

## Personalize/Universalize Vaccines with AI

2022 First Japanese group company to receive a grant from CEPI<sup>\*1</sup>

2023 First IT company to be selected by SCARDA's<sup>\*2</sup> call for applications

### 2023 Achievements

#### Universal Infectious Disease Vaccine

##### SCARDA

Development of design technology for  
influenza was selected

##### Nagasaki University

Launch of joint research  
on tropical infectious diseases

#### Personalized Cancer Vaccine

##### AACR2023<sup>\*3</sup>/ASCO2023<sup>\*4</sup>

Promising clinical efficacy and  
immune response data were  
presented at prestigious conferences

\*1 CEPI: Coalition for Epidemic Preparedness Innovations \*2 SCARDA: Strategic Center of Biomedical Advanced Vaccine Research and Development for Preparedness and Response \*3 AACR: American Association for Cancer Research \*4 ASCO: American Society of Clinical Oncology

# Utilization of Digital Technology for Drug Development

Life  
Science

Genomic information has become easier to obtain

## Introduction of next generation sequencer

- Lower costs

- Gene analysis has become more popular at many sites

Evolution of digital information analysis technology

## Advancement of AI technology

- 2012 Google uses deep learning to help computers recognize cats
- 2015 TensorFlow release
- 2017 **AlphaGo defeats a professional Go player**
- ⋮

NEC's advanced AI technologies

Machine learning  
Papers accepted by prestigious international academic conferences\*1

**10th place in the world**

Video/image processing  
Papers accepted by prestigious international academic conferences\*2

**1st place among Japanese companies**

**NEC is one of the top runners working on developing personalized cancer vaccines**

Utilizing AI which was developed for cancer vaccine design in the field of infectious diseases

Number of papers accepted by prestigious international conferences : \*1 NeurIPS, ICML, KDD, ECML-PKDD, ICDM : \*2 CVPR, ICCV, ECCV, ACCV, ICPR

# Status of AI Drug Development

## Infectious Disease

CEPI

Universal Vaccine

**Beta Coronavirus**

First Japanese group company to win a grant

SHIONOGI

**Hepatitis B**

NEW

SCARDA  
Nagasaki University

Universal vaccine

**Dengue fever  
(and many others)**

NEW

SCARDA

Universal vaccine

**Influenza**

Only IT company to receive a grant

## Oncology

Transgene

TG4050

**Personalized Cancer Vaccine**

Favorable interim data presented at ASCO

NEC  
Oncolmmunity AS

**NECVAX NEO 1**

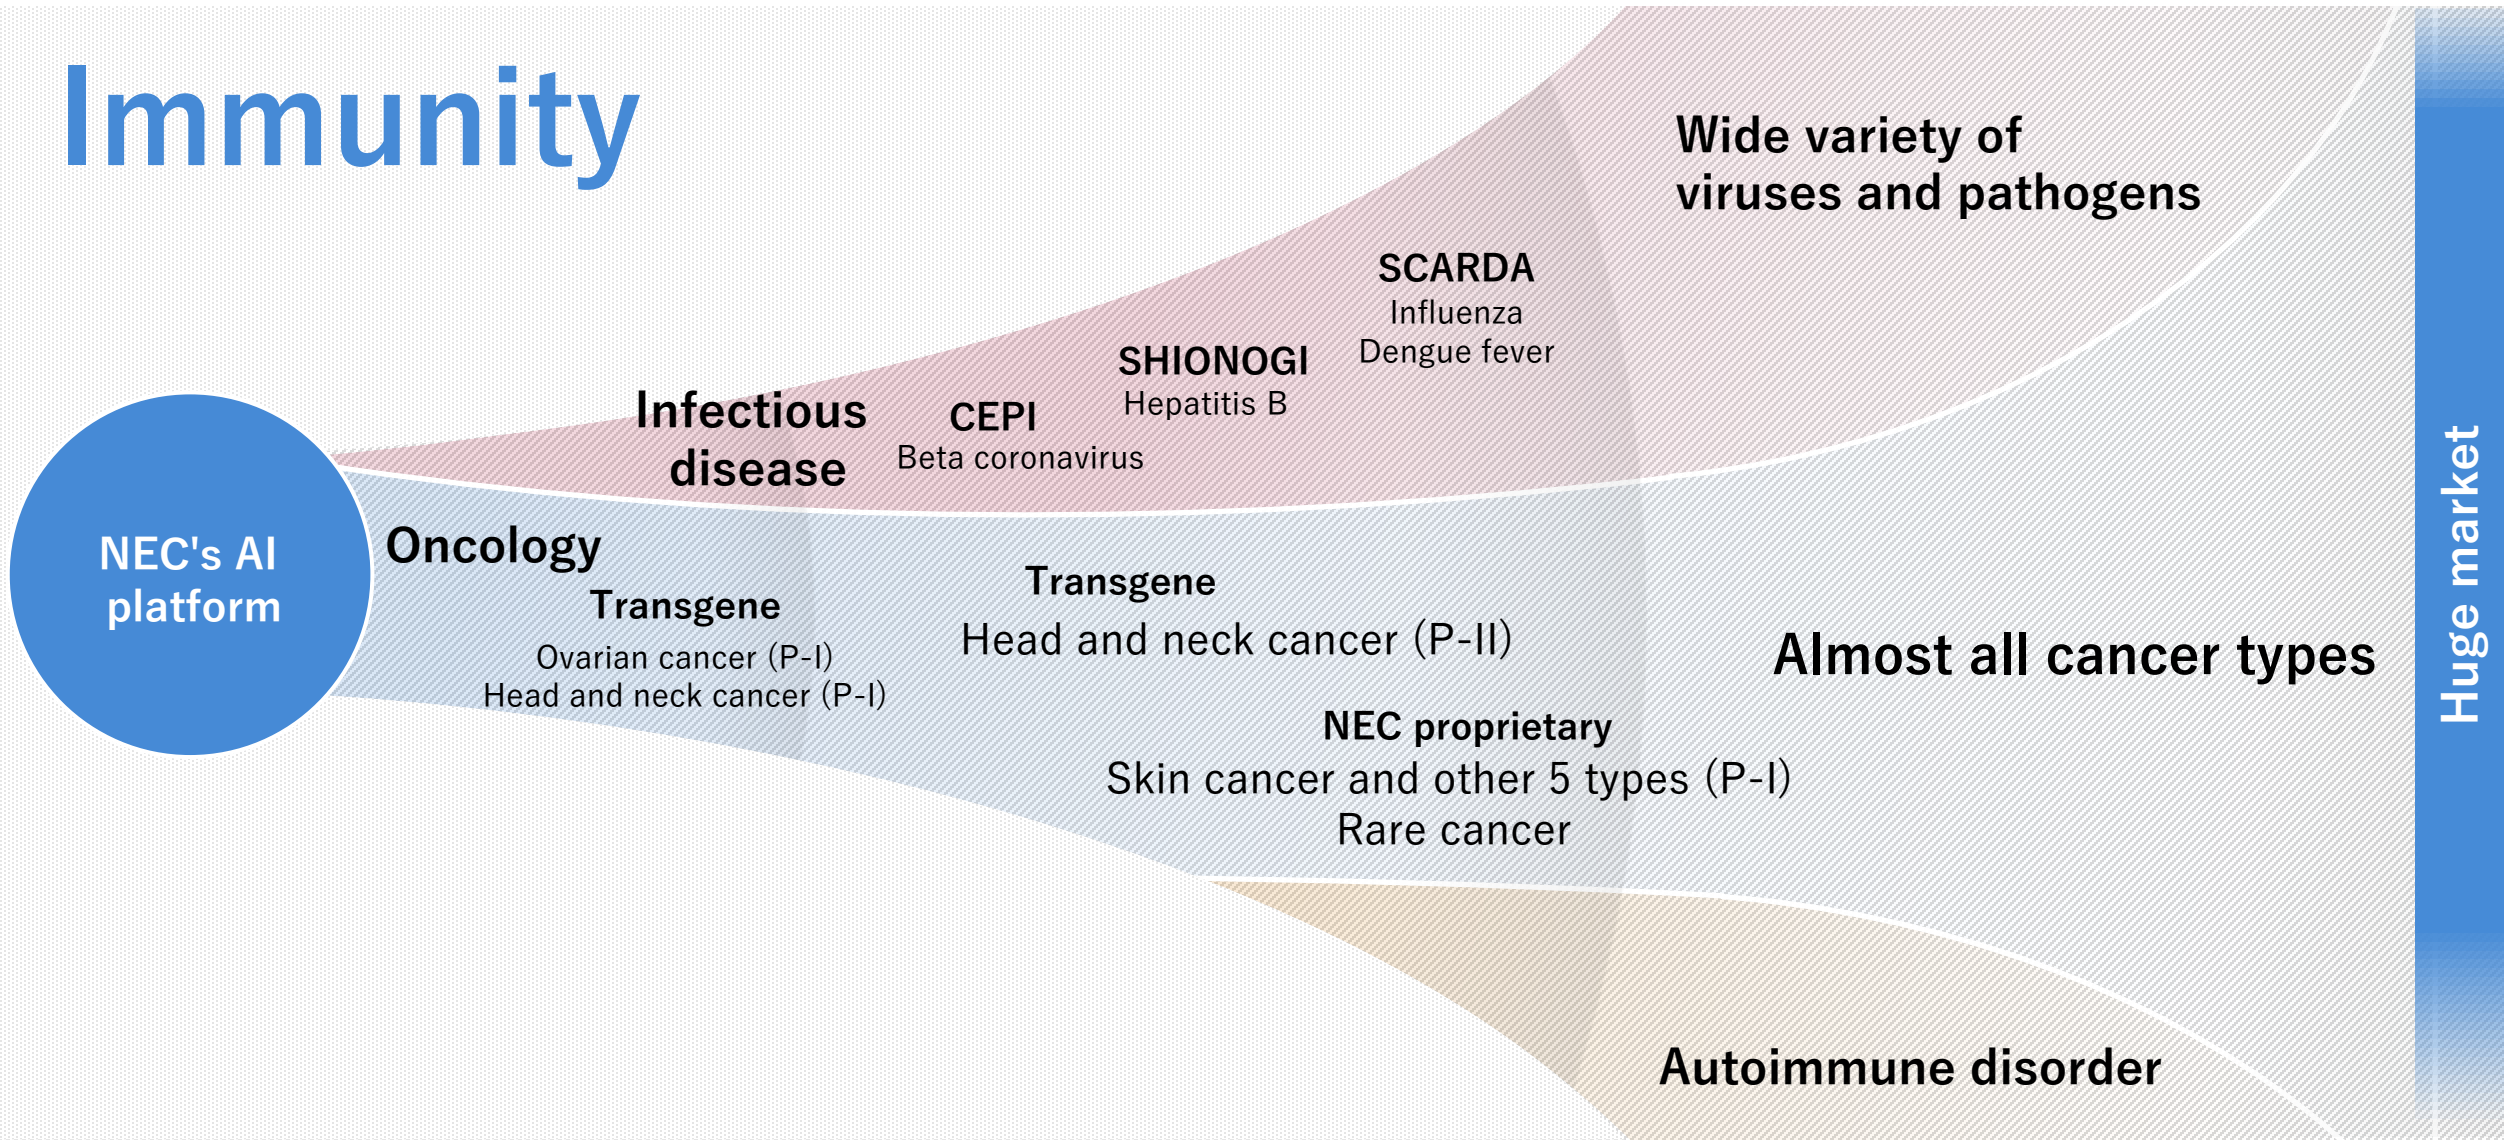

**Personalized Cancer Vaccine**

Clinical trial is ongoing

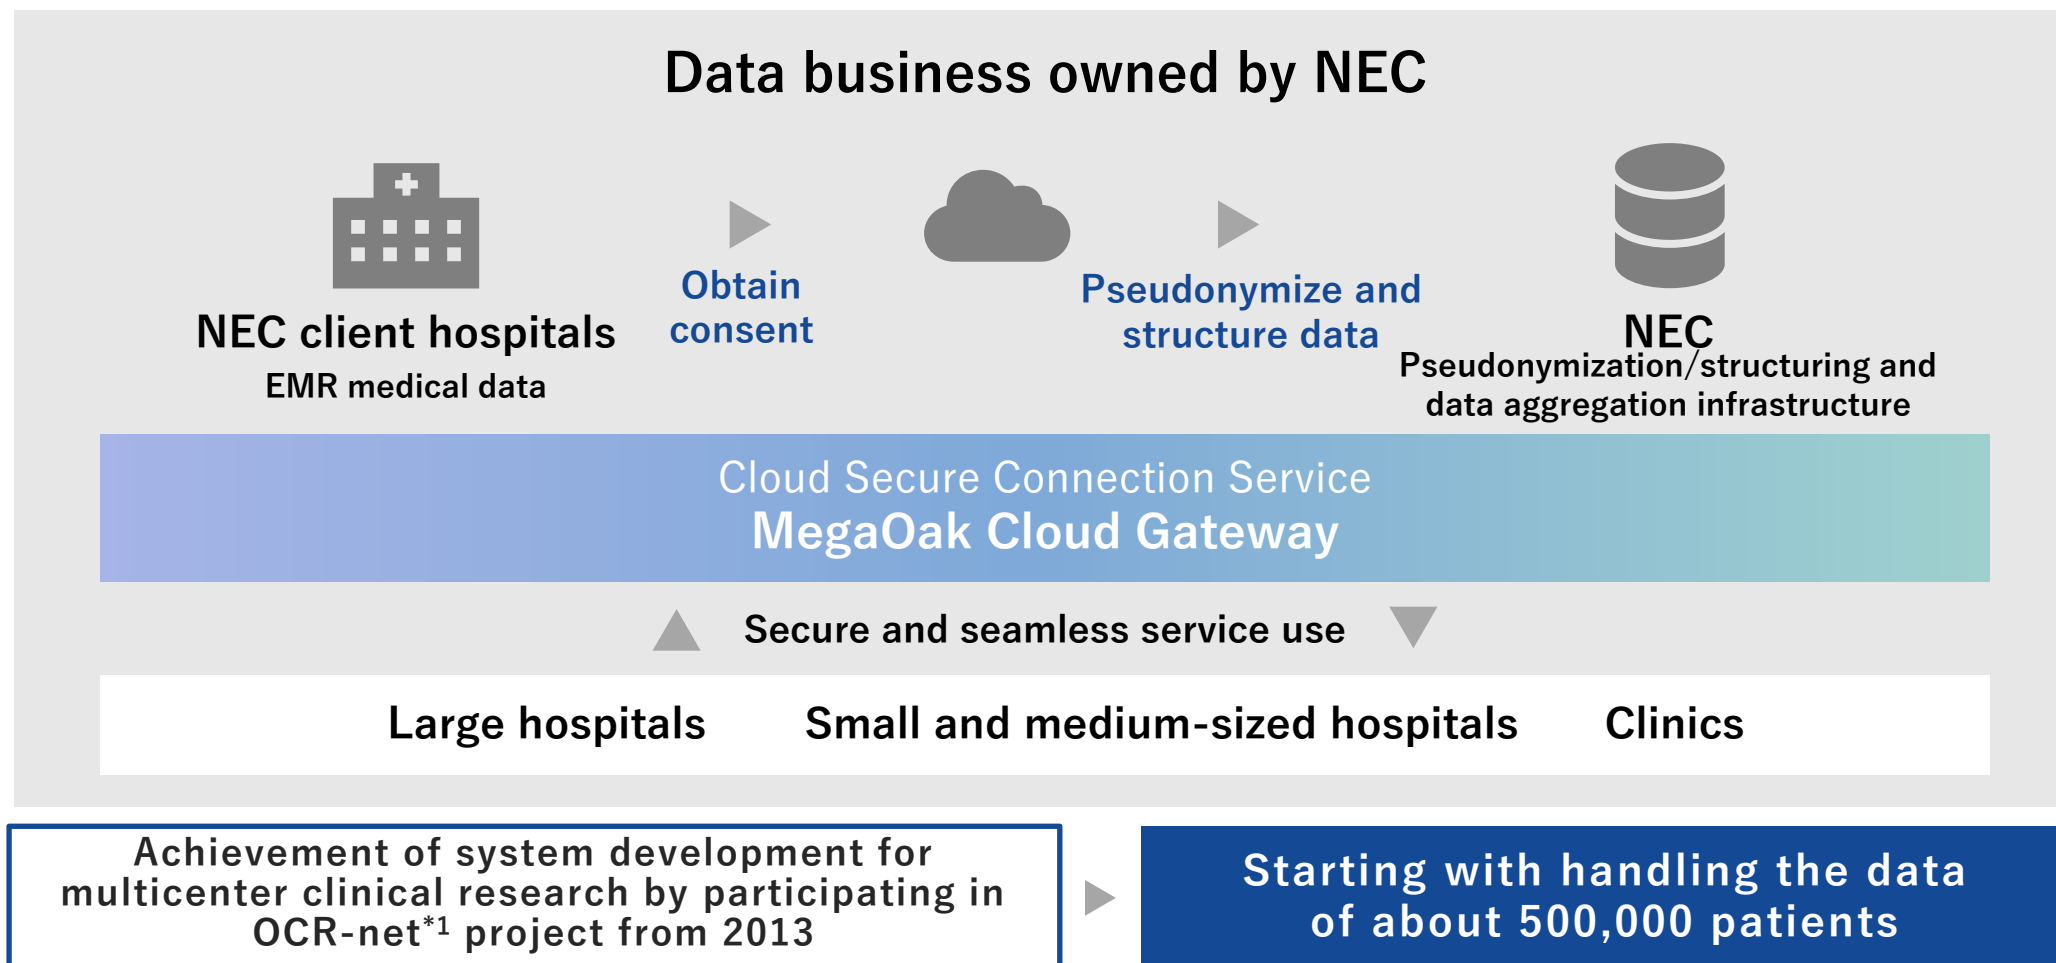

## Immunity

# Towards Sustainable Business Growth

# Start of Data Utilization Business

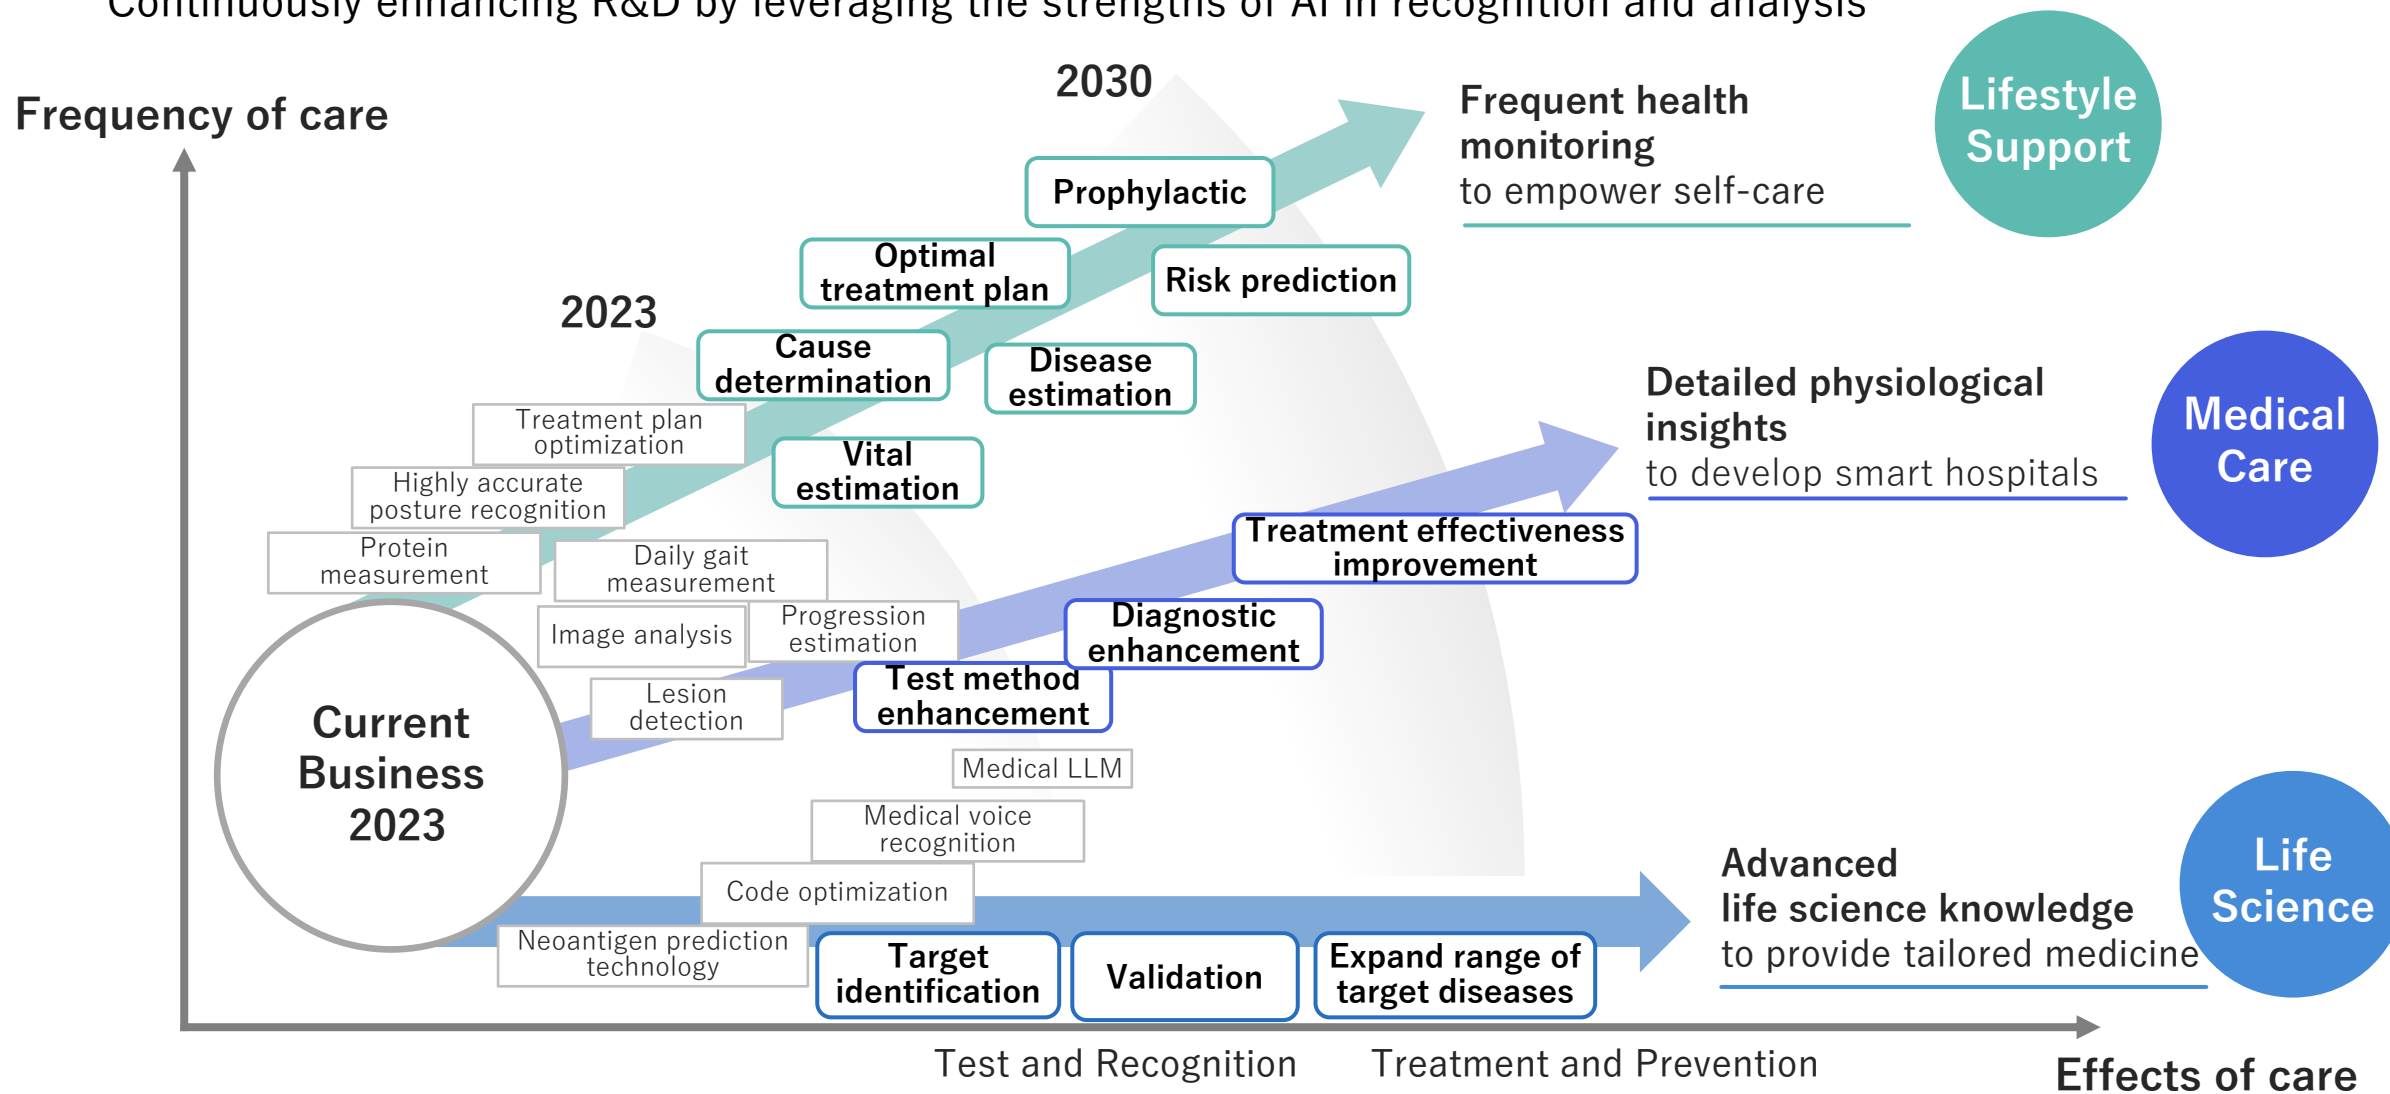

Pseudonymize and structure the data collected from users, enhance convenience and value, provide to pharmaceutical companies, and more

\*1 Osaka Clinical Research Network

# Technology Roadmap

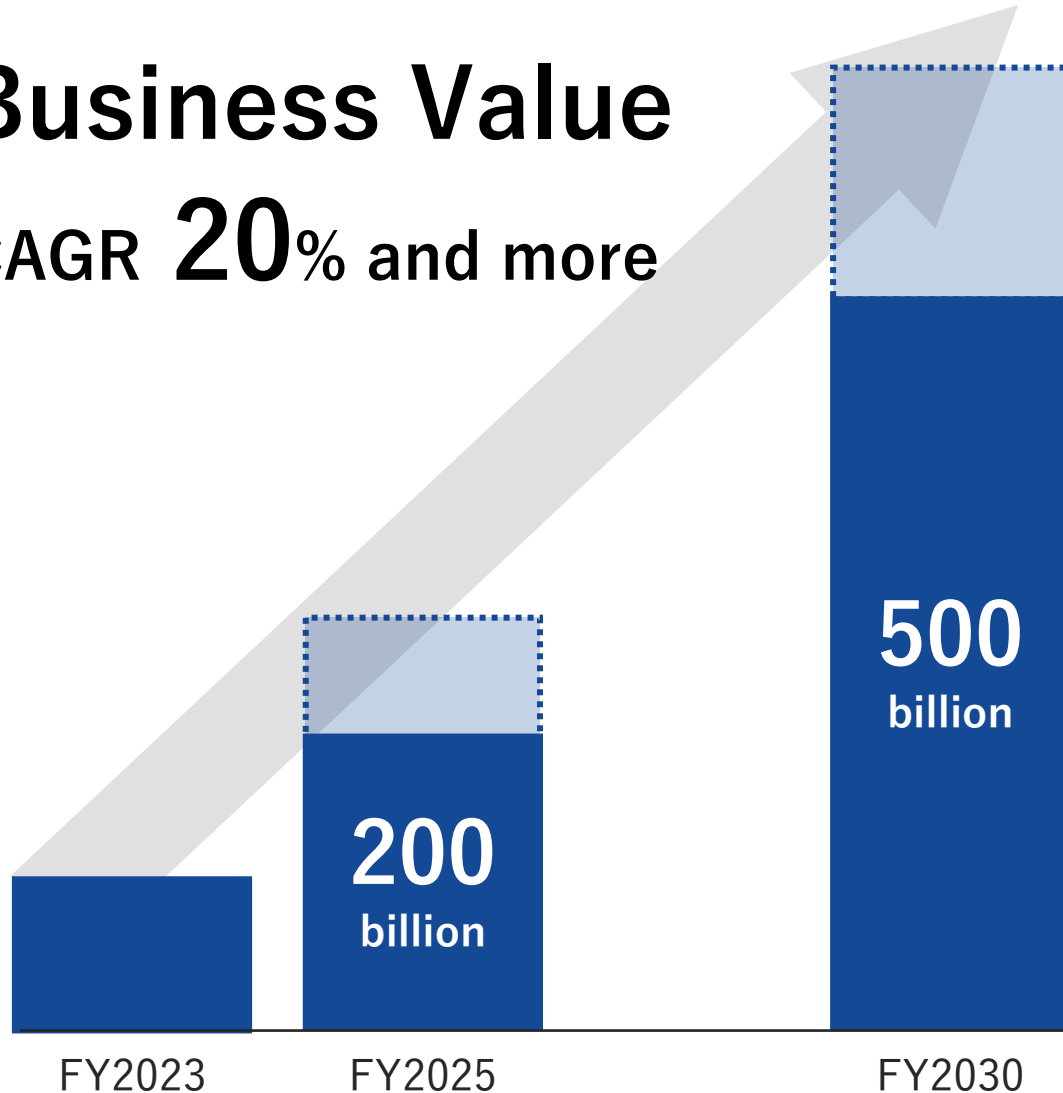

Transitioning from testing and recognition to treatment and prevention through the implementation of digital twins  
Continuously enhancing R&D by leveraging the strengths of AI in recognition and analysis

FY2023 to FY2030

# Business Value

CAGR **20%** and more

## Be an Essential Company

We are committed to becoming an essential force  
in promoting the health of individuals, communities, and industries  
by continuously driving innovation in impactful technologies and services

# live as you

\Orchestrating a brighter world

**NEC**

# Cautionary Statement with Respect to Forward-Looking Statements

This material contains forward-looking statements regarding estimations, forecasts, targets and plans in relation to the results of operations, financial conditions and other overall management of the NEC Group (the "forward-looking statements"). The forward-looking statements are made based on information currently available to the Company and certain assumptions considered reasonable as of the date of this material. These determinations and assumptions are inherently subjective and uncertain. These forward-looking statements are not guarantees of future performance, and actual operating results may differ substantially due to a number of factors.

The factors that may influence the operating results include, but are not limited to, the following:

- adverse economic conditions in Japan or internationally;
- foreign currency exchange and interest rate risks;
- changes in the markets in which the NEC Group operates;
- the recent outbreak of the novel coronavirus;
- potential inability to achieve the goals in the NEC Group's medium-term management plan;
- fluctuations in the NEC Group's revenue and profitability from period to period;
- difficulty achieving the benefits expected from acquisitions, business combinations and reorganizations and business withdrawals;
- potential deterioration in the NEC Group's relationships with strategic partners or problems relating to their products or services;
- difficulty achieving the NEC Group's growth strategies outside Japan;
- potential inability to keep pace with rapid technological advancements in the NEC Group's industry and to commercialize new technologies;
- intense competition in the markets in which the NEC Group operates;
- risks relating to the NEC Group's concentrated customer base;
- difficulties with respect to new businesses;
- potential failures in the products and services the NEC Group provides;
- potential failure to procure components, equipment or other supplies;
- difficulties protecting the NEC Group's intellectual property rights;
- potential inability to obtain certain intellectual property licenses;
- the NEC Group's customers may encounter financial difficulties;
- difficulty attracting, hiring and retaining skilled personnel;
- difficulty obtaining additional financing to meet the NEC Group's funding needs;
- potential failure of internal controls;
- potentially costly and time-consuming legal proceedings;
- risks related to regulatory change and uncertainty;
- risks related to environmental laws and regulations;
- information security and data protection concerns and restrictions;
- potential changes in effective tax rates or deferred tax assets, or adverse tax examinations;
- risks related to corporate governance and social responsibility requirements;
- risks related to natural disasters, public health issues, armed hostilities and terrorism;
- risks related to the NEC Group's pension assets and defined benefit obligations; and
- risks related to impairment losses with regard to goodwill.

The forward-looking statements contained in this material are based on information that NEC possesses as of the date hereof. New risks and uncertainties come up from time to time, and it is impossible for NEC to predict these events or how they may affect the NEC Group. NEC does not intend to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Note: In this presentation, the accounting periods of the fiscal years for March 31, 2022, 2023, and 2024 were referred as FY22/3, FY23/3, and FY24/3 respectively. Any other fiscal years would be referred similarly.
